Biobolics®

Vitamin D3

Cholecalciferol 1000 IU

Biobolics Nutrition® Vitamin D plays a vital role in the regulation of calcium and maintenance of phosphorus levels in the blood*, two factors that are extremely important for maintaining healthy bones. Your body must have Vitamin D to absorb calcium and promote bone growth. Too little Vit D results in soft & misshapen bones in adults. You also need Vitamin D for other important body functions.**.

*Aids In Calcium Absorption**

Biobolics®

Vitamin K

As Menaquinone MK-7

100 mcg with D3 1000IU

Biobolics Nutrition® Vitamin K2 MK7 is the superior form of Vitamin K2 that activates the osteocalcin proteins which incorporate calcium to the bones. Vitamin K, specifically vitamin K2, helps turn on proteins that aid in blood clotting, proper calcium absorption, and heart health. K2 helps promote calcium absorption in the bones while preventing calcium build-up in arteries and organs such as the kidneys. Additionally, Vitamin D3 aids calcium absorption into the bloodstream. Both Vitamin K2 and D3 are fat soluble and enable the metabolism of calcium in our body promoting overall Bone Health*.
